

Clearing Appendix 10

# Collateral List

Commodity Derivatives

Issued by Nasdaq Clearing AB

Effective date: 2017-~~1109~~-2027

## GENERAL CONDITIONS

- A) Property not specifically referenced in this appendix will be valued at zero.
- B) That portion of any approved form of collateral which exceeds the limitations which are referenced below will be valued at zero.
- C) The Clearing House does not allow collateral issued by the Clearing Member/Clearing Client/Direct Pledging Customer itself, or by a company within the same group of companies as the Clearing Member/Clearing Client/Direct Pledging Customer.
- D) For Individual Client Segregated Accounts, the Clearing House does not allow collateral issued by the Clearing Member holding the Individual Client Segregated Account or by a company within the same group as such Clearing Member.
- E) All eligible collateral provided as collateral for undertakings in the clearing operations is valued in accordance with the following:
- Valuations prior to discounting (haircut) are based on the 1) Last Price or 2) Bid Price at 6:30 pm, the previous Bank Day as referenced by Reuters. The Clearing House may, however, decide that the prices that the valuations are based on can be taken at another time.
  - Valuation of bonds and bills is based on settlement date, i.e. bills and bonds are valued at zero when the settlement date is on or after the maturity date.
  - Accrued interest is excluded from the valuation of bonds at the ex-coupon day (with number of settlement days taken into consideration).
  - Bonds are valued at zero at, and after the last ex-coupon date (before the maturity – and last coupon date) of the bond (with number of settlement days taken into consideration).
- F) All securities accepted as collateral shall have daily prices available via Reuters. If daily prices are missing, the security is valued at zero.
- G) Any re-calculation of surplus/deficit into Base Currency in relation to a Margin Requirement Account is subject to the Clearing House's currency valuation ("Haircut when converting Surplus/ Deficit into Base Currency" referenced below).
- H) For eligible collateral to be recognized as accepted collateral, it must be properly pledged or otherwise provided in accordance with the Clearing Rules and instructions, and applicable law.
- I) The Concentration Limits (referenced below) is the percentage allowed of totally posted collateral in relation to a margin requirement account. Any collateral posted exceeding the relevant concentration limit is valued at zero. Concentration limits are set per collateral type (as referenced below).
- J) For securities eligible as collateral, the following applies:
- Outstanding amount: All bonds approved as eligible collateral need to have a minimum outstanding amount of equivalent SEK 100 million per ISIN.
  - Minimum rating criteria: The minimum rating criteria is per issuer or security. Rating from one rating institute is sufficient, but when the issuer or the security is rated by both S&P and Moody's, the lower of the two ratings is applicable. In cases where the minimum rating criteria is A- (S&P) and/or A3 (Moody's) and the issuer (or security) has been given a BBB+ rating by S&P and a A3 rating by Moody's, S&P's rating is used and the security is not eligible as collateral (valued at zero).
  - Maximum time to maturity: The maximum time to maturity shall not be longer than 40 years for eligible bonds.

- K) Pre-delivered EI-Certs and European Union Allowances (EUA) can be used as collateral of net-sellers of these contracts and up to a maximum of the net sold position. The EUA can only be used as collateral from 6 days prior to the expiration day until the settlement day. Pre-delivered assets shall be transferred to the Clearing House with full and valid title, free and clear of all liens, security interests, claims and encumbrances or any interest in or to them by any person (except where in favour of the Clearing House).
- L) The Clearing House is, according to article 42 of Commission Delegated Regulation (EU) No 153/2013 supplementing EMIR, only allowed to accept collateral corresponding to a predefined percentage per collateral issuer (where an issuer is defined so as to include all companies belonging to the same group of companies as the actual issuer) of the Clearing House's total collateral. Therefore, the Clearing House will, in cases where there is a breach of this limit, request individual clearing participants to reduce their exposure toward the specific collateral issuer. In cases where the clearing participant has been requested to reduce its exposure towards a collateral issuer, the clearing participant shall do so, with the required amount, immediately upon request by the Clearing House, unless the Clearing House decides in its discretion to allow more time in specific cases.
- M) All eligible ISIN codes can be found in CMS Web. If a security is eligible as collateral, but not specified as eligible in CMS Web, the Clearing House will not accept the security until such security has been added to the system. A request of adding a security to the system must be made no later than 3pm CET, Monday to Friday (Swedish business days), in order for it to be available in the system the following business day.
- N) The Clearing House is, according to article 39 and Annex I of Commission Delegated Regulation (EU) No 153/2013 supplementing EMIR, only allowed to accept highly liquid financial instruments fulfilling the criteria of having low credit- and market risk. In cases where individual financial instruments fail to fulfill these criteria, based upon the Clearing House's internal assessment, the instruments will be removed as eligible collateral. The removal of such instruments will be done at the Clearing House's full discretion.

## APPROVED COLLATERAL FOR CUSTOMERS PROVIDING COLLATERAL TO CLEARING MEMBERS

- A) Collateral which is accepted according to the Swedish Bank Association's recommendations "Collateral ratio for securities" dated 5 March 2008. As there is no similar reference document for Denmark and Finland the corresponding Danish and Finnish collateral shall be valued by Clearing Members in a same manner as the Swedish securities specified in the above stated recommendations.
- B) Deposits, in an account with the Clearing Member or - if the member is not a credit institution - a Custodian Institution, which are pledged by the Customer to the Clearing Member.

| As recommended in the Swedish Bank Association's "Collateral ratio for securities" dated 5 March 2008 |   |
|---|---|
| When the currency of collateral and Margin Requirement is the same                                    | When the currency of collateral and Margin Requirement is different |
| Value %   | Value %   |
| 100%  | 90%   |

## APPROVED COLLATERAL FOR CUSTOMERS AND / OR CLEARING MEMBERS PROVIDING COLLATERAL TO THE CLEARING HOUSE

### Concentration limits

The concentration limits below refer to the allowed percentage of totally provided collateral per Margin Requirement Account (MRA). If the concentration limit is 50% for the Collateral Type, only 50% of the collateral posted in relation to a Margin Requirement Account can belong to this Collateral Type (for Collateral Types, see below). Collateral exceeding the specified concentration limit will be valued at zero.

### Collateral Types

Allowed collaterals are divided into the following Collateral Types with concentration limits:

1. Cash Collateral – Concentration Limit 100%
2. Government Bonds and Bills – Concentration Limit 100%
3. World Bank Green Bonds – Concentration Limit 100%
4. Covered Bonds - Concentration Limit 95%
5. Kommuninvest Bonds - Concentration Limit 95%
6. ETF – Concentration Limit 50%
7. Pre-delivered EI-Certs and European Union Allowances (EUA) – Concentration limit 100%
8. Equities – Concentration Limit 75%

### Cash Collateral – Concentration Limit 100%

Cash collateral is accepted in the following currencies. Surplus/Deficit in relation to the Margin Requirement Account recalculated into the Margin Requirement Account Base Currency is charged with the below specified haircuts (in case the surplus/deficit is in another currency than the Base Currency).

| Currency               | Value after Haircut | Haircut when converting Surplus/Deficit into Base Currency |
|------------------------|---------------------|--|
| British pounds (GBP)   | 100%                | 10%  |
| Danish kronor (DKK)    | 100%                | 10%  |
| Euro (EUR)             | 100%                | 10%  |
| Norwegian kronor (NOK) | 100%                | 10%  |
| Swedish kronor (SEK)   | 100%                | 10%  |
| US dollars (USD)       | 100%                | 10%  |

### Government Bonds and Bills – Concentration Limit 100%

| Type of instrument  | Instrument currency | Time until Maturity | Value after Haircut | Minimum Rating               |
|---|---------------------|---------------------|---------------------|------------------------------|
| Austrian government bills and fixed rate, unstructured and dated government bonds denominated in EUR. Austrian index linked bonds are not eligible as collateral. | EUR                 | 0-5 years           | 97,0%               | S&P: AA- and/or Moody's: Aa3 |
|   |                     | 5-10 years          | 94,0%               |                              |
|   |                     | 10-20 years         | 90,5%               |                              |
|   |                     | 20-30 years         | 85,0%               |                              |
|   |                     | >30 years           | 84,5%               |                              |
| Danish government bills and fixed rate, unstructured and dated government bonds denominated in DKK. Danish index linked bonds are not eligible as collateral.     | DKK                 | 0-5 years           | 97,0%               | S&P: AA- and/or Moody's: Aa3 |
|   |                     | 5-10 years          | 96,5%               |                              |
|   |                     | 10-20 years         | 96,0%               |                              |
|   |                     | 20-30 years         | 93,0%               |                              |
|   |                     | >30 years           | 70,0%               |                              |

| Type of instrument  | Instrument currency | Time until Maturity | Value after Haircut | Minimum Rating               |
|---|---------------------|---------------------|---------------------|------------------------------|
| Dutch government bills and fixed rate, unstructured and dated government bonds denominated in EUR. Dutch index linked bonds are not eligible as collateral.                         | EUR                 | 0-5 years           | 97,0%               | S&P: AA- and/or Moody's: Aa3 |
