

NASDAQ CLEARING ACHIEVEMENTS

2013-2014

2013

Q2

- Launched a unique client protection model with separate accounts that enables segregation and portability of the client's position and collaterals in the event of a clearing member default. This new model, together with Nasdaq's pre-existing fully segregated model, creates a best-in class segregation offering with over 300 segregated clients today.
- Launch of IRS clearing with cross margining between listed and OTC.
- Implementation of a state of the art Collateral Management system, with seamless migration of over 700 clients into the new solution.

Q4

- Offers the first truly multi-asset clearing solution in Europe that enables trading and clearing of all Nordic financial derivatives and European commodities derivatives in a single operational and technical infrastructure. It also enables clients to trade and clear all asset classes with:
 - One membership
 - One user ID
 - One connection
 - One integrated account structure
 - One payment and collateral management solution
 - One integrated collateral report
- First IRS buy-side clearing.

2014

MARCH

First CCP to become EMIR compliant in Europe.

APRIL

Merged NOS clearing house into NASDAQ OMX Clearing to become one harmonized CCP, adding Freight/Fuel oil and Seafood to the multi-asset offering.

OCTOBER

Growth of IRS open interest of 1200 %, from 4.5 billion USD on May 1, 2013 to 56 billion USD on Oct 31, 2014.

DECEMBER

Nasdaq Clearing named winner of 'FOW European Clearing House of the Year 2014' by FOW's annual International Awards.
